The Hadassah Human Embryonic Stem Cell Research Center  
Sidney Swartz Chair in Human Embryonic Stem Cell Research  
The Goldyn Savad Institute of Gene Therapy &  
The Department of Obstetrics & Gynecology

May 27, 2010

Dear Dr. Miodrag Stojkovic,

I am sending you my warm congratulations for your new position as Director of the Institute for Stem Cell Research and Banking at the Medical School of Kragujevac.

This can be a great opportunity for establishing collaborations between your new institute and my Human Embryonic Stem Cell Research Center at Hadassah.

We share multiple areas of interests in pluripotent stem cell banking, neural differentiation and transplantation for regenerative therapy.

I am sure that establishing collaborations between our institutes will be very fruitful and will bring advancements to the field.

Warm regards,

Benjamin Reubinoff M.D. Ph.D.
